

## Africa Oral Genealogies & Family Histories Project

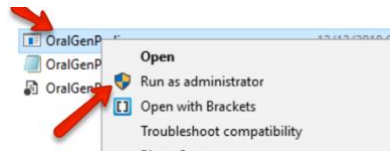

### OralGen Pedigree Software Installer Instructions

If you need to install Legacy on your laptop, follow these instructions:

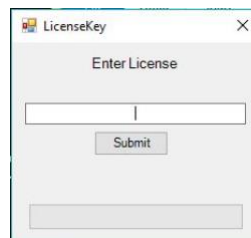

1. Contact your Operations Manager to receive a license number.
2. You will find the Installer .exe file at [http://jobsinafrica.org/collect\\_oral\\_genealogy.php](http://jobsinafrica.org/collect_oral_genealogy.php). Click on [Download OralGen Pedigree Software].

3. Right-click on the OralGenPedigree.exe file. Click on [Run as administrator].

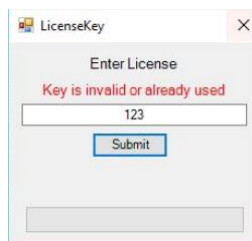

4. Enter the license number you received.

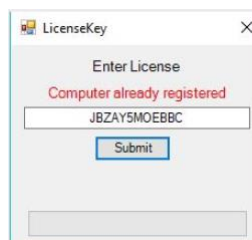

- a. The following errors might appear:

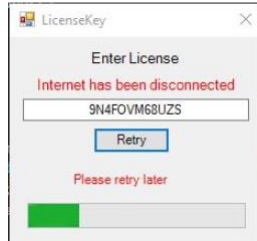

- i. The number is invalid or already used. Re-enter your license number.

- ii. You have already installed the application on your laptop. If Legacy is no longer on your computer, use the license number that you used originally.

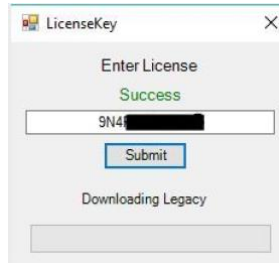

- iii. You internet connection failed while trying to install the application. Re-try when you internet connection is re-established.

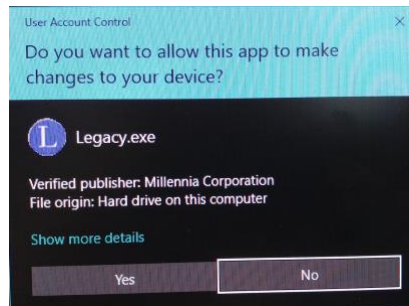

- 5. Wait while the installer makes the connection.

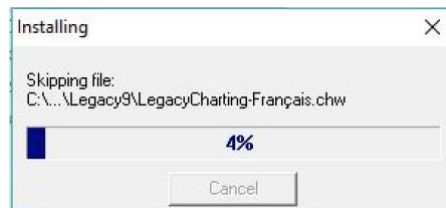

- 6. Wait while Legacy downloads.

- 7. Click [Yes] to allow Legacy to make changes to your computer.

- 8. Wait while Legacy completes the installation.

- 9. You now have Legacy on your computer. The shortcut will appear on your desktop.
